SUMMARY

Final-year B.Tech Computer Engineering student with a strong foundation in programming, software development, and problem-solving. Passionate about emerging technologies like Full-stack-development AI, and cloud computing, with hands-on experience in academic projects. Eager to apply technical skills to real-world challenges and contribute to innovative solutions.

SKILLS

Technical Skills

- Programming Languages: Java, Python, SQL
- Front-End Skills: HTML5, CSS(tailwind css), JavaScript
- Frameworks & Libraries: React.js, express.js
- Databases: MySQL, MongoDB
- Tools & Platforms: Git, GitHub, VS Code

Soft Skills

- communication, teamwork, adaptability, problem-solving, and time management

PROJECTS

Battery Life Prediction

• Built a machine learning model to predict lithium-ion battery life using performance and degradation data. Implemented preprocessing and regression modeling to estimate remaining useful life. Visualized degradation patterns to support predictive maintenance.

Aviation Safety Reports – NLP Text Mining

• Developed an NLP model to classify aviation safety incident reports extracted from PDFs. Used text preprocessing and TF-IDF with LinearSVC to categorize event types. Automated analysis helps interpret narrative reports for safety insights..

House Price Prediction(XG Boost)

• B Cleaned and analyzed housing data using python libraries then trained an XGBoost regression model to predict house prices using selected key features, visualized feature importance

EDUCATION

B.Tech Computer Engineering(AIML)

2022 - ongoing

Presidency University, Bengaluru

- Relevant coursework in Computer Engineering with specialization in AIML.

LANGUAGES

Kannada • English • Hindi

CERTIFICATIONS

- Developing Applications in Python on AWS - AWS
- Databases and SQL for Data Science with Python - IBM
- Python for Data Science, AI & Development - IBM
- Introduction to AI and Machine Learning on Google Cloud - Google Cloud
